

AGRICULTURE JOB.

Enormity of Trying to Provide for Butchers' Run.

AN OPEN WATERWAY CITED

As the Most Feasible Scheme Yet, at Cost of \$100,000.

A COUNCILMAN'S SURVEY IS MADE.

And the Most Marvelous Municipal Water-System Discussed.

SEWERS MAY CAUSE FLOODS

Yesterday afternoon an important inspection of the Spring Garden district was made by the Allegheny Councilman's Committee on Streets and Sewers. The memory of the awful flood several years ago in that region makes any movement for improvement there of interest to everyone. The expedition yesterday was for the purpose of deciding on a proper method of carrying away the large volumes of water which inundate that district so frequently. Councilman P. O. H. Brown, Charles W. Neale, Charles H. Hartman, Michael McFarlane, J. H. Smith, Charles A. Muehlenberg, John R. Wolfe and City Engineer Eckenroth left City Hall at 2:30 P. M. on the mission.

Concord, Madison, Chestnut, O'Hara, Center and Vinal streets and also Spring Garden avenue and Church alley were visited. These streets are all very peculiar, geographically, forming really a half circle that is by being high at both ends and having a fall of several feet in the center, thus giving the water no chance whatever to run off. The center of Center and Vinal streets and Spring Garden avenue is the worst part of the district. It is here that the water accumulates in its greatest volume, causing it to be known as the basin.

DANGEROUS HEIGHTS AND DEPTHS. To give an idea of the formation of the territory for the streets of that section as to their elevation and grade, it might be mentioned that Basin street stands 67 feet above "city datum," and Hill street is only 50 feet, or 17 feet lower. In the case of Spring Garden avenue, the water is 60 feet above "city datum," and Center street is only 42 feet. At No. 18 Spring Garden avenue a sign has been placed on the wall about 12 feet above the street, stating that that mark was the depth of the water when on July 28, 1874, when nearly 200 lives were lost.

Several plans were talked over by the committee. One that for a time seemed to meet the favor of all was to raise Church alley, Spring Garden avenue, Madison street and Concord street, and also to raise the level of the water in the center of the district. It was decided to have the water in the center of the district raised to the level of the water in the center of the district. It was decided to have the water in the center of the district raised to the level of the water in the center of the district.

AN OPEN WATER WAY. In this case it would only be used to carry off the surplus water which could not be carried off through the old plan. It was also decided that the new waterway would be erected according to the old plan, but would follow the old water course of Spring Garden avenue. By doing so it would be possible to have the waterway in the center of the district.

By doing so it would be possible to have the waterway in the center of the district. It was decided to have the water in the center of the district raised to the level of the water in the center of the district. It was decided to have the water in the center of the district raised to the level of the water in the center of the district.

Should the waterway be made it will also be necessary to fill in the street. It will be necessary to fill in the street. It will be necessary to fill in the street. It will be necessary to fill in the street.

Should the waterway be made it will also be necessary to fill in the street. It will be necessary to fill in the street. It will be necessary to fill in the street. It will be necessary to fill in the street.

Should the waterway be made it will also be necessary to fill in the street. It will be necessary to fill in the street. It will be necessary to fill in the street. It will be necessary to fill in the street.

Should the waterway be made it will also be necessary to fill in the street. It will be necessary to fill in the street. It will be necessary to fill in the street. It will be necessary to fill in the street.

Should the waterway be made it will also be necessary to fill in the street. It will be necessary to fill in the street. It will be necessary to fill in the street. It will be necessary to fill in the street.

Should the waterway be made it will also be necessary to fill in the street. It will be necessary to fill in the street. It will be necessary to fill in the street. It will be necessary to fill in the street.

Should the waterway be made it will also be necessary to fill in the street. It will be necessary to fill in the street. It will be necessary to fill in the street. It will be necessary to fill in the street.

INCIDENTS OF RAPIDITY.

A Gripman Tells How Jerks May be Avoided

Two Lines Compared—Sixteen Miles as Hour Talked of in East End.

For some time past there has been complaint made by the patrons of the Citizens' Traction Company as to the manner in which cars are started and stopped. They say that upon starting the car it is started so suddenly that passengers are nearly thrown off their feet, or, at least, after getting half way up the aisle, they are nearly thrown off their feet. The complaint is that the car is started so suddenly that passengers are nearly thrown off their feet, or, at least, after getting half way up the aisle, they are nearly thrown off their feet.

The complaint is that the car is started so suddenly that passengers are nearly thrown off their feet, or, at least, after getting half way up the aisle, they are nearly thrown off their feet. TO FIX A MINIMUM.

Workers of the Connellsville Coke Region Resolve to Conserve and Fix Wages.

The Alternative.

There is to be a great convention of coal miners and mine laborers of the Connellsville coke region at Everon on the 17th, at the following call from Scottsdale last evening clearly set forth:

To the miners and mine laborers of the Connellsville coke region, greeting:

On the 18th of April, 1889, a joint convention of miners and mine laborers, organized and conducted by the Connellsville Coke Region, was held at Scottsdale, and a large majority were most emphatically in favor of adopting a minimum wage for the different classes of work.

Resolved, That it is the opinion of this convention that the minimum wage for the different classes of work should be as follows:

One dollar per 100 bushels for mining room coal; 60 cents per 100 bushels for mining heading coal; 50 cents per 100 bushels for mining drift coal; 40 cents per 100 bushels for mining waste coal; 30 cents per 100 bushels for mining refuse coal; 20 cents per 100 bushels for mining slag coal; 10 cents per 100 bushels for mining tailings coal; 5 cents per 100 bushels for mining waste slag coal; 2 cents per 100 bushels for mining waste tailings coal; 1 cent per 100 bushels for mining waste slag tailings coal; 1/2 cent per 100 bushels for mining waste slag tailings coal; 1/4 cent per 100 bushels for mining waste slag tailings coal; 1/8 cent per 100 bushels for mining waste slag tailings coal; 1/16 cent per 100 bushels for mining waste slag tailings coal; 1/32 cent per 100 bushels for mining waste slag tailings coal; 1/64 cent per 100 bushels for mining waste slag tailings coal; 1/128 cent per 100 bushels for mining waste slag tailings coal; 1/256 cent per 100 bushels for mining waste slag tailings coal; 1/512 cent per 100 bushels for mining waste slag tailings coal; 1/1024 cent per 100 bushels for mining waste slag tailings coal; 1/2048 cent per 100 bushels for mining waste slag tailings coal; 1/4096 cent per 100 bushels for mining waste slag tailings coal; 1/8192 cent per 100 bushels for mining waste slag tailings coal; 1/16384 cent per 100 bushels for mining waste slag tailings coal; 1/32768 cent per 100 bushels for mining waste slag tailings coal; 1/65536 cent per 100 bushels for mining waste slag tailings coal; 1/131072 cent per 100 bushels for mining waste slag tailings coal; 1/262144 cent per 100 bushels for mining waste slag tailings coal; 1/524288 cent per 100 bushels for mining waste slag tailings coal; 1/1048576 cent per 100 bushels for mining waste slag tailings coal; 1/2097152 cent per 100 bushels for mining waste slag tailings coal; 1/4194304 cent per 100 bushels for mining waste slag tailings coal; 1/8388608 cent per 100 bushels for mining waste slag tailings coal; 1/16777216 cent per 100 bushels for mining waste slag tailings coal; 1/33554432 cent per 100 bushels for mining waste slag tailings coal; 1/67108864 cent per 100 bushels for mining waste slag tailings coal; 1/134217728 cent per 100 bushels for mining waste slag tailings coal; 1/268435456 cent per 100 bushels for mining waste slag tailings coal; 1/536870912 cent per 100 bushels for mining waste slag tailings coal; 1/1073741824 cent per 100 bushels for mining waste slag tailings coal; 1/2147483648 cent per 100 bushels for mining waste slag tailings coal; 1/4294967296 cent per 100 bushels for mining waste slag tailings coal; 1/8589934592 cent per 100 bushels for mining waste slag tailings coal; 1/17179869184 cent per 100 bushels for mining waste slag tailings coal; 1/34359738368 cent per 100 bushels for mining waste slag tailings coal; 1/68719476736 cent per 100 bushels for mining waste slag tailings coal; 1/137438953472 cent per 100 bushels for mining waste slag tailings coal; 1/274877906944 cent per 100 bushels for mining waste slag tailings coal; 1/549755813888 cent per 100 bushels for mining waste slag tailings coal;
